Professional Summary

Computer Science student with experience in Python, C++, SQL, data analysis, and data processing. Completed a summer internship working with Alteryx Designer, where I worked on data cleaning, transformation, and workflow development. Built data-driven applications using Python, MongoDB, and visualization tools. Familiar with Data Structures, Algorithms, OOP, and problem-solving, with a growing interest in data analytics and software development.

Education

Medicaps University, Indore, MP **Aug 2023 – Present**
B.Tech in Computer Science and Engineering

Kendriya Vidyalaya Jamuna Colliery, Anuppur, MP **2021 – 2022**
Higher Secondary (PCM)

Experience

Alteryx Summer Internship **Jun 15, 2026 – Jul 10, 2026**
Data Analytics / Alteryx Intern *College Summer Internship*

- Completed a summer internship focused on Alteryx Designer, data preparation, workflow development, and data analysis.
- Designed and executed workflows using basic to intermediate Alteryx tools for data processing and analysis.
- Performed data cleaning, transformation, filtering, joining, and preparation on structured datasets.
- Solved practical data-processing exercises and developed hands-on understanding of workflow-based analytics.

CodeAlpha **Sep 2025 – Oct 2025**
Python Programming Intern *Virtual Internship*

- Completed a virtual internship focused on Python programming, problem solving, debugging, and logical analysis.
- Developed mini-projects using core Python concepts including functions, loops, conditionals, strings, and data handling.
- Strengthened clean coding practices, analytical thinking, and hands-on programming skills.

Technical Skills

- **Languages:** Python, C++, SQL
- **Data & Analytics:** Alteryx Designer, Data Cleaning, Data Transformation, Data Analysis
- **Web Technologies:** HTML5, CSS3, Bootstrap, JavaScript
- **Databases:** MySQL, MongoDB
- **Core Concepts:** Data Structures & Algorithms, OOP, Problem Solving
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook

Projects

ETHOS Security Dashboard *Python, MongoDB, HTML, CSS, JavaScript, Chart.js, vis.js*

- Developed a security dashboard to analyze and monitor suspicious blockchain wallet and transaction activities.
- Performed data preprocessing and behavioral analysis to identify potential automated and fraudulent transaction patterns.
- Integrated MongoDB for persistent storage and implemented interactive visualizations using Chart.js and vis.js.
- Implemented risk visualization, recent analysis records, transaction network analysis, and CSV export functionality.

Hangman Game *Python*

- Developed a console-based Hangman game using random word selection and interactive user input handling.
- Implemented game logic using loops, conditional statements, functions, validation, and string manipulation.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- Alteryx Designer Advanced
- Alteryx Designer Core
- Deloitte Data Analytics Job Simulation
